This dissertation is dedicated to my parents, John and Mary Baker. Have provided and showed support for education. Most important

This dissertation would not have been possible without the support of many people over the past four years. First and foremost, I want to acknowledge my dissertation committee. Daniel Shanahan, my main supervisor throughout my PhD, who provided me with countless office conversations, cups of coffee at Highland, and allowed me the freedom to pursue my interests while a student. Emily Elliott for the support, encouragement, access to resources, and guidance. Robert Peck, support and encouragement while a student at LSU, inspiration

Other faculty in the LSU community, Jason Harmon and Jason Hicks, allowing me opportunities to work in psychology department.

People who took time out of their schedule to help with projects, Craig Sapp.

The #rstats community for developing software, that without which, this dissertation would not have been possible. Both development of the software and making everything so accessible. Specifically Xie for bookdown and Hadley Wickham, tidyverse.

Also thank the many social groups I've floated between during my PhD. London group stemming from Music, Mind and Brain. Daniel Müllensiefen and Lauren Stewart Music Mind and Brain, not possible without recommendation of David Huron, without possible recommendation of Christine Dorey who taught first music psychology course I took while undergraduate at BW.

Peer group, obviously overlapping

Specifically Peter Harrison always there to run ideas past, help with software, and organize monthly pub events. The Music Cognition and Computation at LSU, Connor, Elizabeth, Adam, Juan, Brian, and Katie.

Peers from where majority of my learning took place, specifically Jacob, Michael, Sasha, Adam, Lauryn. Personal support from those that visited me in the swap or those who went to trivia with me every week Will, Rory, Kevin, Phil, Amanda, Ryan, Sarah, Erin, Chris, Jono, Mark and t

Grad Friends: Sasha, Adam, Jacob, Michael Triva crew and Friends: Will, Rory, Kevin, Phil, Amanda, Ryan, Sarah, Erin, Chris Jono, lauryen, mark, tony, kaitlin, anthony

The larger music science community, especially Amy Belfi, sent me opportunities that allowed me to travel to Spain on NSF

SMPC: amy belfi sending opportunities my way resulting in NSF funding, trip to Spain

All the way back to BW: BW professors that listened to me when I said I wanted to do music cognition dr. christine dorey and dr. gene willet and tried to put point me in right direction, then three hour phone call with Dr. Huron where basically mapped out the rest of my 20s for me, followed pretty closely

Family: mom and dad, elizabeth

Evelyn

The candidate confirms that the work submitted is their own and that appropriate credit has been given where reference has been made to the work of others.
